

# Health Care Providers Employed in Direct Care per 100,000 Population, by Health Region and Jurisdiction

Name	Health Care Providers Employed in Direct Care per 100,000 Population, by Health Region and Jurisdiction
Short/Other Names	Health Care Provider Density by Province/Territory
Description	Health care providers employed in the profession and working in direct care, per 100,000 population, by type of provider, health region and province /territory  A measure of access to health care providers
Interpretation	A low or high ratio may be desirable; interpretations should be evaluated alongside other relevant data (e.g., population need, models of care, mix of health care providers).
HSP Framework Dimension	Health System Inputs and Characteristics: Efficient allocation of resources
Areas of Need	Not applicable
Geographic Coverage	All provinces/territories
Reporting Level/Disaggregation	National, Province/Territory, Region
Indicator Results	<a href="https://www.cihi.ca/en/health-workforce">https://www.cihi.ca/en/health-workforce</a>
Identifying Information	
Name	Health Care Providers Employed in Direct Care per 100,000 Population, by Health Region and Jurisdiction
Short/Other Names	Health Care Provider Density by Province/Territory
Indicator Description and Calculation	
Description	Health care providers employed in the profession and working in direct care, per 100,000 population, by type of provider, health region and province/territory  Calculated by dividing the number of health care providers working in direct care in each health region or province/territory by population estimates and multiplying by 100,000
Calculation: Description	(Number of health care providers employed in the profession and working in direct care by health region or province/territory ÷ Population estimate) × 100,000
Calculation: Geographic Assignment	Unit of Analysis: Service provider per 100,000 population
Calculation: Type of Measurement	Place of service
Calculation: Adjustment Applied	Rate - Rate per 100,000
Calculation: Method of Adjustment	None
Denominator	Not applicable  <b>Description:</b> Total population in a Canadian province/territory or in a health region <b>Inclusions:</b> Provincial/territorial or regional population estimates from Statistics Canada <b>Description:</b> Number of health care providers employed in the profession and working in direct care <b>Inclusions:</b> <ul style="list-style-type: none"><li>• Active registered health care providers employed in the profession and working in direct care.</li></ul> Additional inclusion criteria vary by type of provider.
Numerator	<b>Exclusions:</b> <ul style="list-style-type: none"><li>• Health care providers not employed in the profession.</li><li>• Health care providers employed in education, research and administration.</li><li>• Inactive registrants or health care providers who did not register in a Canadian province or territory.</li></ul>

Background, Interpretation and Benchmarks	Additional exclusion criteria vary by type of provider.
Rationale	Based on <a href="#">World Health Organization (WHO) National Health Workforce Accounts</a> indicator 1-03: Density of Active Health Workers per 1,000 Population by Cadre and at Subnational Level, this indicator provides information on the density and distribution of health workers. It can support the assessment of health services and resources at the provincial/territorial levels. A measure of access to health care providers
Interpretation	A low or high ratio may be desirable; interpretations should be evaluated alongside other relevant data (e.g., population need, models of care, mix of health care providers).
HSP Framework Dimension	Health System Inputs and Characteristics: Efficient allocation of resources
Areas of Need	Not applicable
Targets/Benchmarks	WHO: Health worker density and distribution World Health Organization. <i>National Health Workforce Accounts: A Handbook</i> . 2016.

Updates	Not applicable
Quality Statement	CIHI uses the unit of analysis "per 100,000 population," which is different from the WHO's "density per 1,000 population." Caution should be used when comparing results across countries.
Caveats and Limitations	Statistics reported may differ from those reported by other organizations due to differences in data collection and reporting methodologies.  Issues of under- and/or over-coverage may vary by type of provider. Population estimates may change over time.
Trending Issues	Vary by type of provider Please note that the available data years, geographic coverage, reporting level/disaggregation and update frequency vary by type of provider.
Comments	"Available data year" can refer to <b>data year</b> (for nurses) or to <b>reporting year</b> (for occupational therapists, physiotherapists and pharmacists).
