

# Accessing Indicator Results on Your Health System: In Depth

Your Health System (YHS): In Depth provides decision-makers in health regions and facilities with comprehensive information on important health indicators that can be used to examine and assess your health system at the provincial/territorial, regional, hospital and long-term care organization levels. It presents comparative indicator results to facilitate the sharing of best practices and to help generate new ideas for improvement strategies.

Follow the steps below to obtain results for indicators in the [YHS: In Depth web tool](#).

**Step 1:** Get an overview of all results or find out what's been updated.

- Click **Export** in the page header to download results for all indicators in YHS: In Depth.
- Find the list of indicators that were most recently updated with the latest year of data by selecting **What's New** in the page header.

Export data results for all indicators

See what's new since the latest release

# Accessing Indicator Results

**Step 2:** Find results for a specific hospital, long-term care organization, city, health region or province/territory.

a. Enter the name of the organization or jurisdiction into the search bar and select **Indicator Results**.

b. Scroll to the bottom of the page and click the desired indicator to view your results.

<p><b>Access</b></p> <ul style="list-style-type: none"> <li>Emergency Department Wait Time for Physician Initial Assessment (90% Spent Less, in Hours)</li> <li>Total Time Spent in Emergency Department for Admitted Patients (90% Spent Less, in Hours)</li> <li>Has a Regular Health Care Provider</li> <li>Hip Fracture Surgery Within 48 Hours</li> <li>Self-Harm Hospitalizations</li> </ul>	<p><b>Appropriateness and Effectiveness</b></p> <ul style="list-style-type: none"> <li>All Patients Readmitted to Hospital</li> <li>Medical Patients Readmitted to Hospital</li> <li>Surgical Patients Readmitted to Hospital</li> <li>Obstetric Patients Readmitted to Hospital</li> <li>Pediatric Patients Readmitted to Hospital</li> <li>Ambulatory Care Sensitive Conditions</li> <li>High Users of Hospital Beds</li> <li>Hospital Deaths (HSMR)</li> <li>Hospital Deaths Following Major Surgery</li> <li>Low-Risk Caesarean Sections</li> <li>Potentially Inappropriate Use of Antipsychotics in Long-Term Care</li> <li>Restraint Use in Long-Term Care</li> </ul>	<p><b>Safety</b></p> <ul style="list-style-type: none"> <li>In-Hospital Sepsis</li> <li>Obstetric Trauma (With Instrument)</li> <li>Potentially Inappropriate Medication Prescribed to Seniors</li> <li>Falls in the Last 30 Days in Long-Term Care</li> <li>Worsened Pressure Ulcer in Long-Term Care</li> </ul> <p><b>Social Determinants</b></p> <ul style="list-style-type: none"> <li>Heavy Drinking</li> <li>Children Vulnerable in Areas of Early Development</li> <li>Obesity (Age 18 and Older)</li> <li>Smoking</li> <li>Physical Activity (Age 18 and Older)</li> </ul>	<p><b>Health Status</b></p> <ul style="list-style-type: none"> <li>Life Expectancy at Birth</li> <li>Life Expectancy at Age 65</li> <li>Perceived Health</li> <li>Avoidable Deaths</li> <li>Avoidable Deaths From Preventable Causes</li> <li>Avoidable Deaths From Treatable Causes</li> <li>Hospitalized Heart Attacks</li> <li>Hospitalized Strokes</li> <li>Hospitalizations Entirely Caused by Alcohol</li> <li>Improved Physical Functioning in Long-Term Care</li> <li>Worsened Physical Functioning in Long-Term Care</li> <li>Worsened Depressive Mood in Long-Term Care</li> <li>Experiencing Pain in Long-Term Care</li> <li>Experiencing Worsened Pain in Long-Term Care</li> </ul>
